

Drywall Screw Coarse Thread Zinc Plated

KOIN is one of the professional Drywall Screw Coarse Thread Zinc Plated manufacturers and suppliers in China. Over the 15 years, we have been focusing on research in the field of Chipboard Screw, Self Tapping Screw, Self Drilling Screw, Machine Screw, Wood Screw, Drywall Screw. As a professional manufacture, you can rest assured to buy Drywall Screw Coarse Thread Zinc Plated from our factory and we will offer you the best after-sale service and timely delivery.

Product Description

Characteristics and applications of Drywall Screw Coarse Thread Zinc Plated

The biggest feature of Drywall Screw Coarse Thread Zinc Plated in appearance is the shape of horn head, which is divided into double thread fine thread drywall screws and single thread coarse thread drywall screw. The biggest difference between the two is that the thread of the former is double thread, which is applicable to the connection between gypsum board and metal keel with thickness not exceeding 0.8mm, while the latter is applicable to the connection between gypsum board and wood keel.

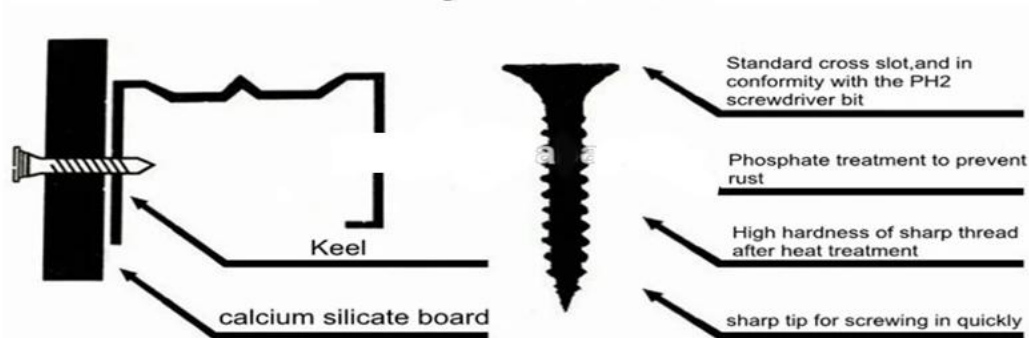

Long drywall screw series is one of the most important categories in the whole fastener product line. Long drywall screws are mainly used for the installation of various gypsum boards, light partition walls and ceiling ceiling series.

Carbonized Drywall Screw Coarse Thread Zinc Plated is the most basic product line, and blue white zinc Drywall Screw Coarse Thread Zinc Plated is a supplement. The application scope and purchase price of the two are basically the same. The slight difference is that the black photostating has certain

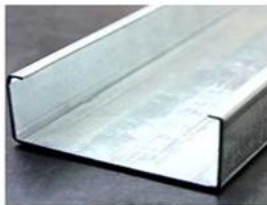

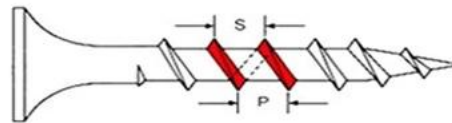

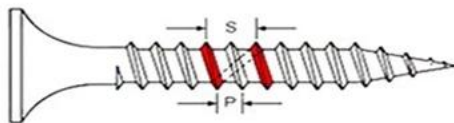

lubricity, and the attack speed (the speed of entering the specified thickness steel plate, which is a quality assessment index) is slightly better; Blue and white zinc is slightly better in rust prevention effect, and the natural color of the product is light, which is not easy to be colored after coating decoration.

There is almost no difference between blue white zinc and yellow zinc in rust prevention ability, only due to different usage habits or user preferences.

Advantages of Our Products

Different Uses

Fine thread drywall screw is able to through and lock in keel for its dense thread ,so it is usually used for steel keels.

Coarse thread drywall screw is able to through keel fast ,so it is usually used for wooden keel.

The process is controlled layer by layer, and everyone pays attention to quality

(1) Quality: Products use high-quality materials to ensure quality. We have a professional QC team to inspect every project from production to packaging. And before leaving the factory, all specifications of products are sampled and tested to ensure stable quality. We guarantee the high-quality coating and low roughness of screws.

(2) Product features: Straight, not easy to break, sharp thread, good drill ability.

(3) Strict quality control:For each order,the quality control department will conduct strict inspection before delivery.Poor quality will be avoided in the door.

(4) Transportation:We have transportation department and freight forwarder,so we can ensure faster delivery and better protection of goods.

(5) Efficiency:Fast production time,only 260 minutes away from the nearest Shanghai port.

(6)Service:Customer service answers customer questions online 24 hours a day,and uses high-quality materials to ensure quality.

Drywall Screw Coarse Thread Zinc Plated product parameter

SPECIFICATION

Type	Drywall Screw
Product Name	Drywall Screw Coarse Thread Zinc Plated
Standard	GB/DIN/BSW/ISO/ANSI
Color	Yellow,Blue,Silver,Black
Material	Carbon Steel(C1022A)
Surface Treatment	Photostatting,Zinc plating
Head Type	Bugle Head
Groove Type	Phillips
Point	Drill Point or Sharp Point
Size	M3-M6.3/#4-#14
Length	10-120mm
Roughness	Ra0.4-1.6
Features	Good Anti Corrosion Ability
HS Code	7317000000 7318130000 7318140090 7318120001
Sample	Provide
MOQ	1000000Pieces
Transport Package	Bulk,Bag,Box,Plastic Barrel
Price	FOB Ningbo or Shanghai port

Payment method	T/T
Delivery Time	30-60days
Production Capacity	500Tons/Month
Origin	Zhejiang China
OEM	Support OEM

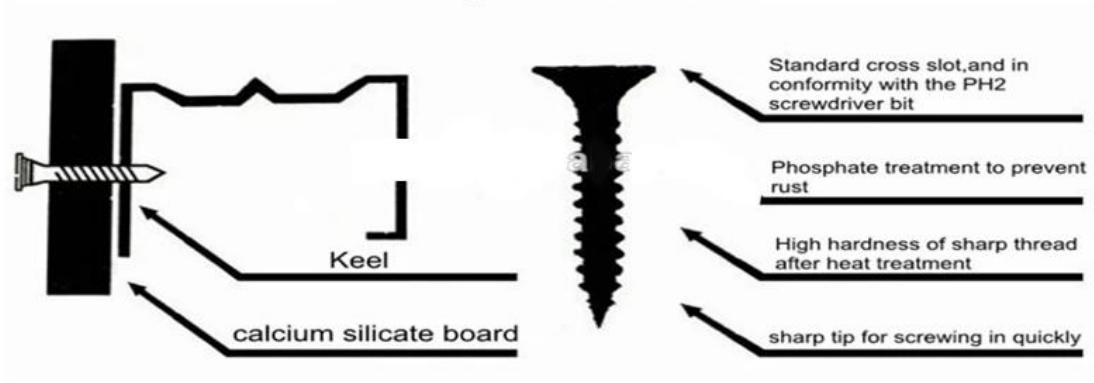

Product advantages:

1. Use good quality material to ensure the quality
2. High quality coating and low roughness
3. Straight,not easy to broken
4. Sharp thread,good drilling
5. Stable quality
6. Fast production time

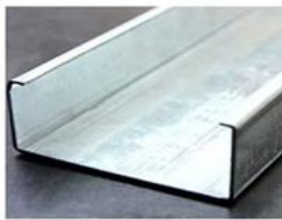

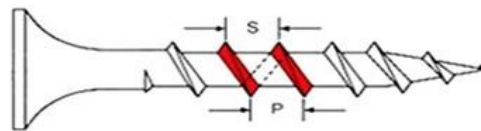

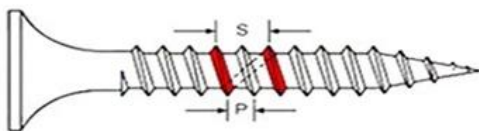

Instructions for the use of Drywall Screw Coarse Thread Zinc Plated

Tools for installing Drywall Screw Coarse Thread Zinc Plated:the screwdriver is its loading and unloading tool,and its shape matches the groove shape of the Drywall Screw Coarse Thread Zinc Plated;In addition,there is a special screw driver installed on the bow drill,which is suitable for loading and unloading larger Drywall Screw Coarse Thread Zinc Plated,which is more convenient and labor-saving.Another thing to pay attention to is that Drywall Screw Coarse Thread Zinc Plated must be screwed in with a screw driver.Never knock in with a hammer,which will damage the surrounding wood.

Advantages of Our Products

Different Uses

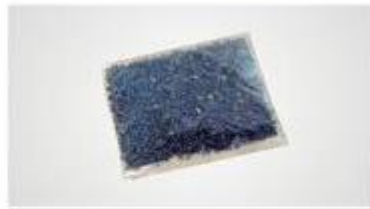

Fine thread drywall screw is bale to through and lock in keel for its dense thread ,so it is usually used for steel keels.

Coarse thread drywall screw is able to through keel fast ,so it is usually used for wooden keel.

Packing method of Drywall Screw Coarse Thread Zinc Plated

We usually use bulk,color box,Kraft carton,PC plastic box,PC plastic bucket,tray and other packaging methods.
Of course, customers can also customize.
